**Received CFDA Approval for Its Jointly Developed  
LED-based Wearable Phototherapy Device****Further Expanded Its Product Portfolio and Competitiveness  
in the Paediatric Medical Equipment Market**

(Hong Kong, 20 February 2018) – **Vincent Medical Holdings Limited** (“Vincent Medical” or together with its subsidiaries, the “Group”, stock code: 1612) is pleased to announce that Kanga-care™, a LED-based wearable phototherapy device that the Group and Avalon Photonics Holdings Limited (“Avalon Photonics”) jointly developed, has successfully attained the approval on registration from China Food and Drug Administration (“CFDA”). Avalon Photonics is a medical device and technologies company under the leadership of Dr. Manson Fok and Dr. Johnson Yiu-Nam Lau. It has reached an investment agreement with the Group to jointly advance the ongoing development and commercialisation of Kanga-care™ in September 2017.

Kanga-care™, classified as a CLASS-II device, is an innovative portable phototherapy device for intended application in neonatal jaundice, suitable for both home and hospital use. It consists of a cotton fabric wrapper embedded with light panels that connects to a handy light emitting device, which allow cuddling and establishment of breastfeeding without interrupting phototherapy, while removing the need of eye-shield for infants or parents.

“Receiving CFDA’s approval for marketing the Kanga-care™ in China is a significant achievement for Avalon Photonics, we believe Kanga-care™ will offers material benefits to the newborns, their parents as well as the caregivers. We thank our medical advisors Drs. Philomena Tse and Jane Fang for their clinical advice and Vincent Medical for the excellent support provided during the product development and approval process. We now look forward to bringing this innovative product to the China market.”, said **Dr. Manson Fok, MBBS, FRCS, Chairman of Avalon Photonics.**

**Mr. Vincent Choi, Chairman of Vincent Medical,** commented, “We are extremely pleased to announce the approval of Kanga-care™ in the important Chinese market. This represents another major step in enhancing our capabilities, as well as extending our product coverage into the paediatric medical equipment market, which is one of the fastest-growing areas in China where we see great potentials. To complement the success in registration, we will raise our sales and marketing effort to drive product adoption and sales channel expansion for commercial launch in China.”

– End –

### **About Vincent Medical Holdings Limited (Stock code: 1612)**

Established in 1997, Vincent Medical Holdings Limited is a Hong Kong-headquartered medical device manufacturing group. The Group develops, manufactures and sells a wide range of medical devices, focusing on respiratory products, imaging contrast media power injector disposable products, and orthopaedic and rehabilitation products, which satisfy internationally-recognised quality assurance standards, to its customers in the PRC and overseas markets. The Group has established its OEM business since its inception and its OBM business in 2003 with its "Inspired Medical" (「英仕醫療」) brand. The Group has developed a domestic and overseas distributorship network for its OBM business, which currently has over 392 distributors and other customers in the PRC, and approximately 48 overseas distributors and other customers in various countries such as Australia, Japan, Korea, Indonesia, India, Chile, Brazil and Saudi Arabia.

### **About Avalon Photonics**

Avalon Photonics is a medical device and technologies company that researches and develops photo-therapeutic technologies for managing various diseases. The R&D operation, with a team of physicians, engineers, and scientists, is located at the Hong Kong Science Park. In 2017, the company has setup a manufacturing site at Banan, Chongqing. The first product is a wearable LED-based medical device (Kanga-care™) for managing neonatal jaundice.
